90-Day Root Cause Healing Protocol

Generated: March 16, 2026 | FF PMA 5R Framework

EXECUTIVE SUMMARY

Comprehensive 90-day healing protocol addressing recurrent ER+/PR+/HER2+ breast cancer through the Forgotten Formula PMA 5R Framework. This protocol identifies and addresses six root causes spanning environmental toxicity, childhood trauma, nutritional deficiency, heavy metal poisoning, pathogenic burden, and cellular dysfunction.

PRACTITIONER NOTES

After meeting with Kathryn and understanding her story, her life, and her responsibilities as a mother and grandmother of 14, I feel strongly that this is something we can address. Kathryn's case exemplifies the lifetime accumulation of health insults — from childhood mold exposure that damaged her respiratory system, to devastating trauma that triggered early puberty and lifelong estrogen dominance, to critical mineral depletion that disabled her body's natural cancer defenses. The mercury amalgam still in her mouth has been slowly poisoning her immune system for 50 years. Her first cancer was treated with surgery alone — the root causes were never touched. That's why it came back. We will not make that mistake.

ROOT CAUSE ANALYSIS

#	Root Cause	Category	Details
1	Childhood Mold Exposure (Ages 6-13)	Environmental	Chronic mold from bedroom roof leak. Mycotox
2	Sexual Abuse !' Estrogen Dominance	Trauma/Hormonal	Extreme trauma !' cortisol !' early puberty !' ER
3	Critical Mineral Deficiencies	Nutritional	Copper !' p53/p21 dysfunction. Iodine !' breast
4	Mercury Toxicity (Amalgam Present)	Heavy Metal	50 years continuous mercury vapor from amalg
5	Viral & Parasite Load	Pathogenic	Suppresses p53/p21 cancer suppressors.
6	Gut/Mitochondrial Dysfunction	Cellular	Tetracycline damage + standard diet !' gut inte

TREATMENT PHASES

Phase	Timeline	Focus	Key Actions
1. Foundation & Detox	Weeks 1-4	Supplement foundation, detox	Full supplement protocol, paras HBOT 3x/wk
2. Targeted Therapy	Weeks 5-8	Hormones, cancer peptides	Post-amalgam chelation, FOXO RGCC, liver cleanse
3. Regeneration	Weeks 9-12	Oral peptides, regeneration	Oral peptide transition, 5-day fas
4. Maintenance	Ongoing	Sustain gains	Quarterly labs, core supplemen

INJECTABLE PEPTIDES

Peptide	Vial	Reconstitution	Dose	Frequency	Duration	Purpose
LL-37	5mg	1mL BAC water	4-8 units	Daily	6 weeks	Antimicrobial — patho
PNC-27	10mg	1mL BAC water	20 units	Daily	6 weeks	Cancer cell targeting -
Thymogen	20mg	2mL BAC water	20 units	M/W/F	4 weeks	Thymic immune recon
Epithalon+Pinealon	45mg	2mL BAC water	10-20 units	Daily	30 days	Telomere protection, p
FOXO4-DRI	10mg	2mL BAC water	5mg wkly	Weekly	4 wks (Ph2)	Senolytic — clears zo
KGlow-25	25mg	2mL BAC water	10-20 units	M/W/F	90 days	Tissue regeneration, c
Gonadorelin	2mg	1mL BAC water	20 units	M/W/F	8 weeks	Hormonal axis optimiz

PCC BIOREGULATORS

Bioregulator	Target Organ	Dose	Frequency	Duration
Thymus PCC	Thymus	1 capsule	Daily (AM)	90 days
Mammary PCC	Mammary/Breast	1 capsule	2x daily (AM+PM)	90 days
Liver PCC	Liver	1 capsule	Daily (AM)	90 days
Ovary PCC	Ovary	1 capsule	Daily (AM)	90 days
Pineal PCC	Pineal Gland	1 capsule	Daily (PM)	90 days

SUPPLEMENTS

Supplement	Dose	Timing	Purpose
Nascent Iodine	3 drops	AM empty stomach	Breast tissue protection
Copper	2mg	Morning	p53/p21 gene restoration
Selenium	200mcg	AM+PM split	Antioxidant defense
Liposomal Vitamin C	2000mg	Morning	Immune + antioxidant
D3-K2	10,000IU	Morning	Immune modulation
Curcumin+	1000mg	Midday	Anti-inflammatory
Turkey Tail	1000mg	Midday	Immune activation
B17	500mg	Midday	Cancer cell targeting
MitoStac	Per label	Bedtime	Mitochondrial activation
Mighty Blue	Per label	Midday	Mitochondrial support
Zeolite	Per label	Bedtime	Heavy metal chelation
Trace Minerals	1 serving	Evening	Cellular function

PARASITE / ANTIVIRAL PROTOCOLS

Agent	Dose	Schedule	Duration	Purpose
Fenbendazole	222mg	3 days on, 4 off	12 weeks	Anti-parasitic + anti-cancer
Ivermectin	12mg	2x/week	12 weeks	Broad-spectrum anti-parasiti
Nitazoxanide	500mg	2x/day	Weeks 1-4	Anti-protozoal
Blushwood Berry	Per label	Daily bedtime	12 weeks	Tumor necrosis compound

IV / IM THERAPIES

Therapy	Frequency	Duration	Purpose
IV Vitamin C (High Dose)	2x/week	Wks 1-12	Pro-oxidant cancer cell destruction
IV DMSO	1x/week	Wks 1-8	Mercury detox, crosses BBB
IV Hydrogen Peroxide	1x/week	Wks 1-8	Pathogen elimination
Ozonated Glycerin IV	1x/week	Wks 5-12	Immune activation
NAD+ IM	1x/week	Ongoing	Mitochondrial restoration
LipoB IM	1x/week	Ongoing	Fat metabolism, liver support

DETOX PROTOCOLS

Protocol	Method	Frequency	Instructions
FF Detox Bath	Immersion	3x/week	Baking soda + Clay + Epsom salt + laven
Liver & Gallbladder Cleanse	Oral protocol	Once (Wk 6-7)	Apple juice prep, olive oil + grapefruit juic
5-Day Fast	Water/broth	Once (Wks 9-10)	Physician-supervised autophagy protocol
Ozone Oil Pulling	Oral swish	Daily AM	Ozonated oil, 20 min. Addresses oral path
Clay Detox (Internal)	Oral	Daily	Bentonite clay binds mycotoxins in GI trac

LIFESTYLE & DIETARY RECOMMENDATIONS

%¸ ZERO sugar — cancer cells consume 18x more glucose (Warburg effect)
%¸ ZERO GMO foods — glyphosate damages gut and endocrine system
%¸ ZERO alcohol for 90 days — liver must focus on estrogen metabolism
%¸ Organic only — reduce toxic burden
%¸ Cruciferous vegetables DAILY — DIM for estrogen metabolism
%¸ Wild-caught fish 3x/week — omega-3 anti-inflammatory
%¸ URGENT: Amalgam removal (SMART protocol biodentist)
%¸ Weekly counseling or EMDR for childhood trauma
%¸ EMF reduction — phone airplane mode at night, no WiFi in bedroom

REQUIRED LABS

%¸ CBC with differential
%¸ Comprehensive Metabolic Panel
%¸ Hormone Panel (Estradiol, Progesterone, Testosterone, DHEA-S, Cortisol)
%¸ Thyroid Panel (TSH, Free T3/T4, Reverse T3, antibodies)
%¸ Copper/Zinc Ratio
%¸ Iodine Loading Test
%¸ Heavy Metals Panel
%¸ Mycotoxin Panel
%¸ Inflammatory Markers (hs-CRP, ESR, IL-6)
%¸ G6PD (before IV Vitamin C)
%¸ RGCC Test
%¸ GI-MAP Stool Analysis

FOLLOW-UP SCHEDULE

Week	Action	Details

Confidential — Private Member Communication

Week 2	Phone check-in	Assess tolerance and compliance
Week 4	Lab work + assessment	CBC, hormones, minerals, inflammatory markers
Week 6	Liver & Gallbladder Cleanse	Supervised cleanse protocol
Week 8	Comprehensive reassessment	Repeat labs, imaging, protocol adjustment
Week 10	5-Day Fast	Supervised autophagy protocol
Week 12	90-day completion	Full assessment, Phase 4 planning
