Quick Tips

PMA

Detox Bathing

Supplies Needed:

2- Cups Dead Sea Salt
2- Cups Baking Soda
⅛- Cup Bentonite Clay*
⅛-*Borax can also be used occasionally*

Detox Bathing Should be done at least 3 times per week no matter if you are sick or not the daily exposures of chemicals, emf, and toxins require it in a modern world. The Dead Sea Salt goes in through the feet giving much needed minerals. The sodium bicarbonate alkalizes the toxins that are being released from the skin.

Directions: Mix all ingredients in hot water. Hot enough to sweat not hot enough to burn. Meditation is advised during this time. Let this be "YOU" time. Focus on breathing, play guided meditation, or simply relax while listening to some frequency healing music. Take the time to detox the day away.
