EACH ML:

L-Carnitine 20mg
L-Arginine 20mg
Methionine 25mg
Inositol 50mg
Choline 50mg
B6 (Pyridoxine) 25mg
B5(Dexpanthenol) 25mg
B12 (Methyl-cobalamin) 1mg

216mg/ml
IM ONLY

Perfect For:

- ✓ Weight management programs
- ✓ Low energy or chronic fatigue
- ✓ Hormone or metabolism support
- ✓ Nutrient deficiency correction
- ✓ Fitness recovery and performance
- ✓ Liver support & detox protocols

Formula Breakdown (Per 1 mL)

L-Carnitine (20 mg): Enhances beta-oxidation by transporting long-chain fatty acids into the mitochondria. Supports mitochondrial ATP output and metabolic flexibility.

L-Arginine (20 mg): Nitric oxide precursor supporting vasodilation, nutrient delivery, and protein synthesis.

Methionine (25 mg): Essential lipotropic amino acid required for hepatic fat clearance and glutathione production.

Inositol (50 mg): Improves insulin sensitivity, neuronal signaling, and lipid metabolism.

Choline (50 mg): Critical methyl donor; essential for VLDL formation and prevention of hepatic fat accumulation.

B6 — Pyridoxine (25 mg): Cofactor for >100 enzymatic reactions including amino acid metabolism, neurotransmitter synthesis, and red blood cell production.

B5 — Dexpanthenol (25 mg): Required for CoA synthesis; supports adrenal function, energy production, and cellular repair.

B12 — Methyl-cobalamin (1 mg): Methyl donor for homocysteine clearance, neurological health, and DNA synthesis.
